## SP-1835

SP-1835 is a VGA splitter with 8 ports. It allows one PC to split the same image into 8 VGA output signals to show it on up to eight monitors. Furthermore, it supports cascade by two ties.

Advantages: high bandwidth, resolution and reliability. As well as the long-distance signal-transmission, the maximum long-distance can reach 65 meters. It could be used in fitness companies, securities business, computer exhibition hall, public broadcasting and education & training center etc.

### FEATURES

- \* Transmission over long distances up to **65m**
- \* perfect for convenient wiring and improves cable utilization ratio
- \* has a strong anti-interference ability
- \* high resolution, 1920 x 1080 (max. 2048 x 1536, 60Hz, simulated)
- \* is easy to use with high reliability

## Specifications

Type	SP-1835	
Connections	Input	1x HD15 male HDB
	Output	8x HD15 female
LED`s	Power	1x red LED
Signal	Signal type	VGA, SVGA, Multisync
	Bandwidth	350MHz
Specifications	Power Input	DC 9V / 300mA
	Resolution	1920 x 1080
	max. resolution (simulated)	2048 x 1536
	Dimensions (L x W x H)	220mm x 112mm x 41mm
Farbe	black	
Gehäuse	metal	
Gewicht	0.9 kg / 1.25 kg (incl. packaging)
