SP-1250

SP-1250 is a VGA splitter with 2 ports. It allows one PC to split the same image into 2 VGA output signals to show it on up to two monitors. Furthermore, it supports cascade by two ties.

Advantages: high bandwidth, resolution and reliability. As well as the long-distance signal-transmission, the maximum long-distance can reach 65 meters. It could be used in fitness companies, securities business, computer exhibition hall, public broadcasting and education & training center etc.

FEATURES

- * Transmission over long distances up to **65m**
- * perfect for convenient wiring and improves cable utilization ratio
- * has a strong anti-interference ability
- * high resolution, 1920 x 1080 (max. 2048 x 1536, 60Hz, simulated)
- * is easy to use with high reliability

Specifications

Type	SP-1250	
Connections	Input	1x HD15 male HDB
	Output	2x HD15 female
LED`s	Power	1x red LED
Signal	Signal type	VGA, SVGA, Multisync
	Bandwidth	500MHz
Specifications	Power Input	DC 9V / 300mA
	Resolution	1920 x 1080
	max. Resolution	2048 x 1536 (simulated)
	Dimensions (L x W x H)	132mm x 92mm x 41mm
Farbe	black	
Gehäuse	metal	
Gewicht	0.8 kg / 1.1 kg (incl. packaging)
